SMC, MLC AND ISSC EXTENSION - AUTHORIZATION LETTER

OUR REF: SEG-053101

.....

This Administration has been informed that the IMO International Safety Management (ISM) Code, International Ship Port Facility Security (ISPS) Code and Maritime Labor Convention (MLC) interim survey have been carried out and additional time will be needed for the company to comply with said IMO Codes so that the initial surveys can take place.

Taking into account that the vessel (1) is undergoing subsea charterer inspection and various modifications, like ROV installation arrangement, vessel DP reference system modification, crane modification as per charter requirement, etc and (2) was commercially idle for quite a long time, his Administration authorizes BV to extend the SMC, ISSC and MLC interim certificates for sixty (60) calendar days from the interim expiration date (July 18th, 2023) to the date below indicated.

This authorization has been issued based on the perspective of the SOLAS Ch I Reg. 14 (e) which has as unique purpose to allow to the ship (unit) to complete its surveys wherein they will be completed; therefore, it is understood that the owner/operators of this vessel will make the all-necessary arrangements so as to carry out / complete the mentioned surveys by the expiration date of this authorization letter.

This authorization expires on **September 16, 2023**

Please notify all concerned parties accordingly.

Best Regards,

Eng. Arnulfo Botacio R.
